

2017 CMS Quality Reporting - ABSTRACTION PROCESS OVERVIEW

2017 CMS Quality Reporting - MEASURE-SPECIFIC EXCLUSIONS

Measure Title	Measure-Specific Exclusions
CARE-1 Medication Reconciliation Post-Discharge	No current medications listed No discharge medications listed No follow-up visit in chart Follow-up > 32 days (30 days, +/- 2 days from prefilled discharge date) Author is not a prescribing practitioner, RN, or clinical pharmacist
CARE-2 Screening for Future Falls	Patient non-ambulatory at most recent encounter on 9/1/17 during CY 2017
DM-2 Diabetes - Hemoglobin A1c (HbA1c) Poor Control (>9%)	Patient has no diagnosis of Type 1 or 2 diabetes on chart Patient has no <i>active</i> diagnosis of Type 1 or 2 diabetes on chart Elevated blood sugar is due to another medical condition, e.g., steroids for asthma Hemoglobin A1c (HbA1c) is ≤ 9% No Hemoglobin A1c (HbA1c) on chart
DM-7 Diabetes - Eye Exam	Patient has no diagnosis of Type 1 or 2 diabetes on chart Patient has no <i>active</i> diagnosis of Type 1 or 2 diabetes on chart during MP Elevated blood sugar is due to another medical condition, e.g., steroids for asthma Retinal or dilated eye exam was not performed as part of exam No eye exam on chart Exam performed outside of measure-specified time period, i.e., 1/1/2016 - 12/31/2017
HTN-2 Controlling High Blood Pressure	No active diagnosis of essential hypertension between 01/01 and 06/30/2017 Systolic blood pressure > 140 Diastolic blood pressure > 90
IVD-2 Ischemic Vascular Disease (IVD) - Use of Aspirin or Another Antiplatelet	No acute myocardial infarction between 01/01 - 12/31/2016 No coronary artery bypass graft between 01/01 - 12/31/2016 No percutaneous coronary intervention between 01/01 - 12/31/2016 No active diagnosis of ischemic vascular disease during the measurement period No documented use of aspirin or other antiplatelet medication during the measurement period Patient is taking one of the Denominator Exclusion Anticoagulant Medications
MH-1 Depression Remission at Twelve Months	Patient has an active diagnosis of bipolar disorder Patient has an active diagnosis of personality disorder No <u>index</u> PHQ-9 on chart between 12/01/2015 - 11/30/2016 Index PHQ-9 score is ≤ 9 No <u>repeat</u> PHQ-9 on chart at 12 months after the <u>index</u> PHQ-9 (+/- 30 days) Repeat PHQ-9 score ≥ 5
PREV-5 Breast Cancer Screening	Patient had a bilateral mastectomy Patient had two (2) unilateral mastectomies No mammogram on chart between 10/01/2015 - 12/31/2017 Most recent mammogram was before 10/01/2015 Patient received an MRI or Ultrasound instead of a mammogram Patient-reported results are listed by the provider, however either the test type, date, or result is missng
PREV-6 Colorectal Cancer Screening	Patient has a history of colorectal cancer Patient has a history of total colectomy Patient received only digital rectal exam Patient-reported results are listed by the provider, however either the test type, date, or result is missng

Measure Title	Measure-Specific Exclusions
PREV-7 Influenza Immunization	No chart documentation reflecting that the patient received an influenza immunization during a clinic visit between 10/01/2016 - 03/31/2017 No chart documentation reflecting that the patient reported having previously received an influenza immunization between 08/01/2016 - 03/31/2017
PREV-8 Pneumococcal Vaccination Status for Older Adults	No chart documentation that the patient ever received either the PCV13 or PPSV23 pneumonia vaccination, either alone or in combination Patient-reported results are listed by the provider, however either the test type, date, or result is missing
PREV-9 Body Mass Index (BMI) Screening and Follow-Up Plan	Patient is pregnant Patient refused height and/or weight measurement Patient refused follow-up Patient is ≥ 65 years and weight loss or gain would complicate other health conditions, such as: illness or physical disability; mental illness, dementia, confusion; or vitamin/mineral deficiency Patient is emergent or urgent and a treatment delay would jeopardize patient health No BMI charted during current encounter or during the six (6) months prior to current encounter Patient's Body Mass Index is on the patient chart and is within normal range Patient's Body Mass Index is on the chart and abnormal but there is no follow-up plan
PREV-10 Tobacco Use - Screening and Cessation Intervention	Patient was not screened between 01/01/2016 and 12/31/2017 Patient is a non-smoker Patient had a positive screen however cessation counseling was not provided to the patient
PREV-12 Screening for Depression and Follow-Up Plan	Patient has an active diagnosis of bipolar disorder Patient has an active diagnosis of personality disorder No depression screen on chart Patient refuses assessment Patient is emergent or urgent and a treatment delay would jeopardize patient health Patient's functional capacity or motivation to improve may impact the accuracy of results Patient was not screened with a standardized tool Patient has positive screen but no follow-up plan is documented Follow-up plan is present but missing the minimum requirement Follow-up plan does not refer to the positive screen
PREV-13 Statin Therapy for the Prevention and Treatment of Cardiovascular Disease	Patient not "high-risk" i.e., patient does not meet at least one (1) of the three (3) reporting criteria for this measure Patient pregnant or breastfeeding or diagnosed with rhabdomyolysis Patient is allergic or intolerant of statin medication Patient has active liver/hepatic disease or insufficiency Patient has end-stage renal disease (ESRD) Patient is diabetic with most recent fasting or direct LDL-C < 70 mg/dl and is not taking a statin

2017 CMS Quality Reporting Quick Reference Guide

Measure	Description	Exclusions	Definitions	Data Guidance	
CARE-1 Medication Reconciliation Post-Discharge	<p>Patients ≥ 18 yrs who were:</p> <ul style="list-style-type: none"> -- discharged from any inpatient facility <i>(See Data Guidance)</i> <li style="text-align: center;">AND -- seen within 30 days post-discharge by professional providing ongoing care <li style="text-align: center;">AND -- discharge medication list was reconciled with the current medication list in the MR. 	<ul style="list-style-type: none"> • Deceased during CY 2017 • In hospice, including non-hospice with palliative goals or comfort care at anytime during CY 2017 • Moved out of country at anytime during CY 2017 • Enrolled in HMO at any time during CY 2017 	<ul style="list-style-type: none"> • CY = Calendar Year • <i>Inpatient facility</i> = acute care hospital, inpatient psychiatric facility, skilled nursing or inpatient rehabilitation • HMO = Health Maintenance Organization • MP = Measurement Period = 01/01/2017 - 12/31/2017 • MR = Medical Record • OV = Office visit • <i>Professional providing ongoing care</i> = physician, prescribing practitioner, registered nurse, or clinical pharmacist • WI = Web Interface 	<ol style="list-style-type: none"> (1) Inpatient discharges are pre-populated by CMS using claims data (2) Denominator is based on individual discharges followed by an OV, not individual patients. As a result, there may be multiple charge dates for the same patient (3) Each prefilled discharge date can be confirmed with a "yes" if the discharge date documented in the MR is + or - 2 days from the prefilled discharge date (4) Documentation of the current medications with a notation that references the discharge medications, such as: <ul style="list-style-type: none"> -- <i>no changes in meds since discharge</i> -- <i>same meds at discharge</i> -- <i>discontinue all discharge meds</i> (5) Documentation of the patient's current medications with a notation that the discharge medications were reviewed. (6) Documentation that the provider "reconciled the current and discharge meds." (7) Documentation of a current medication list, a discharge medication list <u>and</u> notation that the appropriate practitioner type reviewed both lists on the same date of service (8) Notation that no medications were prescribed or ordered upon discharge. (9) Medication reconciliation post-discharge <u>can</u> be performed during telehealth encounter 	
CARE-2 Falls - Screening for Future Fall Risk	<p>Patients ≥ 65 yrs who were:</p> <ul style="list-style-type: none"> -- screened for future fall risk during CY 2017 	<ul style="list-style-type: none"> • Patient non-ambulatory at most recent encounter during CY 2017 • Deceased during CY 2017 • In hospice, including non-hospice with palliative goals or comfort care at anytime during CY 2017 • Moved out of country at anytime during CY 2017 • Enrolled in HMO at any time during CY 2017 	<ul style="list-style-type: none"> • CY = Calendar Year • <i>Fall</i> = A sudden, unintentional change in position causing an individual to land at a lower level, on an object, the floor, or the ground, other than as a consequence of sudden onset of paralysis, epileptic seizure, or overwhelming external force. • HMO = Health Maintenance Organization • MP = Measurement Period = 01/01/2017 - 12/31/2017 • MR = Medical Record • <i>Screening for Future Fall Risk</i> = assessment of whether an individual has experienced a fall or problems with gait or balance. While a specific screening tool is not required for this measure, potential screening tools include the Morse Fall Scale and the timed Get-Up-And-Go test. • WI = Web Interface 	<ol style="list-style-type: none"> (1) A clinician with appropriate skills and experience may perform the screening (2) <i>Documentation of no falls is sufficient</i> (3) MR must include documentation of screening performed (4) Any history of falls screening during CY 2017 is acceptable (5) A gait or balance assessment is acceptable (6) A specific screening tool is not required (7) Fall risk screening is embedded within the Medicare Annual Wellness Visit documentaion (8) Fall risk screening <u>can</u> be performed during telehealth encounter 	
DM Composite - All or Nothing	DM-2 Diabetes - Hemoglobin A1c (HbA1c) Poor Control (>9%)	<p>Patients 18 - 75 yrs during CY 2017 with:</p> <ul style="list-style-type: none"> -- active diagnosis or documented history of Type 1 or Type 2 DM during CY 2016 or CY 2017 <li style="text-align: center;">AND -- <i>most recent</i> HbA1c > 9% during CY 2017 	<ul style="list-style-type: none"> • Diagnosis of secondary DM due to other condition • Deceased during CY 2017 • In hospice, including non-hospice with palliative goals or comfort care at anytime during CY 2017 • Moved out of country at anytime during CY 2017 • Enrolled in HMO at any time during CY 2017 	<ul style="list-style-type: none"> • <i>Active Diagnosis</i> = a diagnosis that is: <ul style="list-style-type: none"> -- on the patient's problem list -- a diagnosis code on the encounter, or -- documented in a progress note indicating that the patient is being treated or managed for the disease or condition during the CY 2017 • CY = Calendar Year • DM = Diabetes Mellitus • HMO = Health Maintenance Organization • MP = Measurement Period = 01/01/2017 - 12/31/2017 • MR = Medical Record • WI = Web Interface 	<ol style="list-style-type: none"> (1) Synonyms for HbA1c testing may include Glycohemoglobin A1c, HbA1c, Hemoglobin A1c, HgbA1c, A1c (2) Data source priority ranking: <ul style="list-style-type: none"> -- Lab report draw date (also known as collection date) -- Lab report date -- Flow sheet documentation -- Practitioner notes -- Other documentation -- Patient reported result (source of last resort) (3) Both patient reported and chart listed results must include date of test and numeric result (range unacceptable) (4) Documentation of <i>most recent</i> HbA1c result <u>can</u> be completed during a telehealth encounter
	DM-7 Diabetes - Eye Exam	<p>Patients 18 - 75 yrs with:</p> <ul style="list-style-type: none"> -- active diagnosis or documented history of Type 1 or Type 2 DM during CY 2016 or CY 2017 <li style="text-align: center;">AND -- a retinal or dilated eye exam performed or read by an ophthalmologist or optometrist during CY 2017 or -- a <u>negative</u> retinal or dilated eye exam (e.g. no evidence of retinopathy) during CY 2016 	<ul style="list-style-type: none"> • Diagnosis of secondary DM due to other condition • Deceased during CY 2017 • In hospice, including non-hospice with palliative goals or comfort care at anytime during CY 2017 • Moved out of country at anytime during CY 2017 • Enrolled in HMO at any time during CY 2017 	<ul style="list-style-type: none"> • <i>Active Diagnosis</i> = a diagnosis that is: <ul style="list-style-type: none"> -- on the patient's problem list -- a diagnosis code on the encounter, or -- documented in a progress note indicating that the patient is being treated or managed for the disease or condition during the MP • CY = Calendar Year • DM = Diabetes Mellitus • HMO = Health Maintenance Organization • MP = Measurement Period = 01/01/2017 - 12/31/2017 • MR = Medical Record • WI = Web Interface 	<ol style="list-style-type: none"> (1) Patient Reported Requirement: Date (year) and result/finding (2) If an endocrinologist or PCP performs the appropriate imaging in their office and the results are reviewed by an eye care professional (<i>optometrist or ophthalmologist</i>) during CY 2017 or CY 2016 (if negative for retinopathy) then it is eligible for use in reporting (3) If the eye exam is not performed or reviewed by an ophthalmologist or optometrist, results may be read by a qualified reading center that operates under the direction of a medical director who is a retinal specialist (4) Documentation of diabetic retinal disease screening <u>can</u> be completed during a telehealth encounter

2017 CMS Quality Reporting Quick Reference Guide

Measure	Description	Exclusions	Definitions	Data Guidance
HTN-2 Controlling High Blood Pressure	<p>Patients 18 - 85 yrs with:</p> <ul style="list-style-type: none"> -- an active diagnosis of essential HTN between <u>01/01/2017</u> and <u>06/30/2017</u> <p style="text-align: center;">AND</p> <ul style="list-style-type: none"> -- whose most recent blood pressure reflects adequate control (i.e., <140/90 mmHg) during the MP 	<ul style="list-style-type: none"> • Active diagnosis through <i>start</i> of CY 2017: <ul style="list-style-type: none"> -- ESRD -- Pregnancy -- Stage 5 CKD • Diagnosed <i>before or during</i> CY 2017: <ul style="list-style-type: none"> -- Dialysis -- History of renal transplant • Patients ≥ 65 yrs in an Institutional SNP or residing in a long-term care facility with a POS code 32, 33, 34, 54, or 56 at anytime during CY 2017 • Deceased during CY 2017 • In hospice, including non-hospice with palliative goals or comfort care at anytime during CY 2017 • Moved out of country at anytime during CY 2017 • Enrolled in HMO at any time during CY 2017 • Diagnosis of pregnancy during CY 2017 	<ul style="list-style-type: none"> • <i>CKD</i> = Chronic Kidney Disease • <i>CY</i> = Calendar Year • <i>ESRD</i> = End-Stage Renal Disease • <i>HMO</i> = Health Maintenance Organization • <i>MP</i> = Measurement Period = 01/01/2017 - 12/31/2017 • <i>MR</i> = Medical Record • <i>SNP</i> = Special Needs Plan • <i>WI</i> = Web Interface 	<ol style="list-style-type: none"> (1) Only BP readings performed by a clinician in the provider office are acceptable (2) If there are multiple BP readings on the same day, use the <i>lowest systolic</i> and <i>lowest diastolic</i> measurements (from different readings, if appropriate) as the most recent BP reading (3) Patient-reported BP values are <i>not acceptable</i> (4) If no BP is recorded during CY 2017, the patient's blood pressure is assumed "not controlled" (5) BP screening <u>cannot</u> be completed during a telehealth encounter
IVD-2 Ischemic Vascular Disease (IVD) - Use of Aspirin or Another Antiplatelet	<p>Patients ≥ 18 yrs who were:</p> <ul style="list-style-type: none"> -- diagnosed with AMI, CABG, or PCI during CY 2016 <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> -- active diagnosis of IVD <i>during</i> CY 2017 and -- had documentation of ASA or other antiplatelet use during CY 2017 	<ul style="list-style-type: none"> • Documentation of Denominator Exclusion Anticoagulant Medication use overlapping CY 2017 • Diagnosis of PVD and/or PAD do not qualify as IVD • Deceased during CY 2017 • In hospice, including non-hospice with palliative goals or comfort care at anytime during CY 2017 • Moved out of country at anytime during CY 2017 • Enrolled in HMO at any time during CY 2017 	<ul style="list-style-type: none"> • <i>Active Diagnosis</i> = a diagnosis that is: <ul style="list-style-type: none"> -- on the patient's problem list -- a diagnosis code on the encounter, or -- documented in a progress note indicating that the patient is being treated or managed for the disease or condition during CY 2017 • <i>AMI</i> = Acute Myocardial Infarction • <i>ASA</i> = Aspirin • <i>CABG</i> = Coronary Artery Bypass Graft • <i>CY</i> = Calendar Year • <i>HMO</i> = Health Maintenance Organization • <i>IVD</i> = Ischemic Vascular Disease • <i>MP</i> = Measurement Period = 01/01/2017 - 12/31/2017 • <i>MR</i> = Medical Record • <i>PAD</i> = Peripheral Arterial Disease • <i>PCI</i> = Percutaneous Coronary Intervention • <i>PVD</i> = Peripheral Vascular Disease • <i>WI</i> = Web Interface 	<ol style="list-style-type: none"> (1) Denominator Exclusion Anticoagulant Medications: <ul style="list-style-type: none"> -- Apixaban / Eliquis -- Argatroban / na -- Bivalirudin / Angiomax -- Dabigatran / Pradaxa -- Dalteparin / Fragmin -- Desirudin / Iprivask -- Edoxaban / na -- Enoxaparin / Lovenox -- Fondaparinux / Arixtra -- Heparin / na -- Lepirudin / Refludan -- Rivaroxaban / Xarelto -- Tinzaparin / Innohep -- Warfarin / Coumadin (2) Oral antiplatelet meds include: <ul style="list-style-type: none"> -- ASA / Bayer, etc. -- clopidogrel / Plavix -- combination of aspirin and extended-release dipyridamole / Aggrenox -- Prasugrel / Effient -- Ticagrelor / Brilinta -- Ticlopidine / Ticlid (3) Antiplatelet use documentation <u>can</u> be completed during a telehealth encounter
